

Replacing a Background Project

In this project you will replace the background of various images. This will require you to use selection tools and create image masks. Use a variety of selection tools. Remember, some selection tools work better than others depending on the image.

Tip: Follow the handout on Replacing a Background to complete this assignment.

Replace the following images with the backgrounds indicated:

- Replace the background of **bag_cob.jpg** with **bag_background** jpg
- Replace the background of **computer_cob.jpg** with **computer_background** jpg
- Replace the background of **pepper_cob.jpg** with **pepper_background** jpg
- Replace the background of **snack_cob.jpg** with **snack_background** jpg
- Replace the background of **parthenon_cob.jpg** with **Blue_Sky** jpg
- Replace the background of **urban.jpg** with **Blue_Sky** jpg
- Replace the pool water of **pool.jpg** with **pool_water.** jpg
- Replace the background of **woman_cob.jpg** with **woman_background** jpg

This last image will require the use of the Select & Mask tool in the upper menu bar. Choose the On Layers view. Refine by adjusting the sliders.

When completed with each image you will need to optimize and scale. Scale each image so that the largest dimension is no greater than 500 pixels.

Place all images in the images folder in the “replacing_backgrounds_wepage” folder. Add the images to the web page.
